Description of Defect, how it came to light, and possible consequences if ignored.	We have determined that the fallback level of the steering software may unfortunately not correspond to the specifications in certain right-hand drive vehicles. In the event of a non-system-related and independent hardware fault, the fallback level of the steering would be activated. In the vehicles affected by the issue, the fallback level may not respond as intended in this extremely rare case. As a consequence, power steering may be impaired and a loss of steerability cannot be ruled out, which would increase the risk of accident and injury.
Remedial Action	As a precautionary measure, to update the electric steering software on the affected vehicles.
